DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-24 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite phrase such as "partially" and "substantially" In the context of modulation, it is unclear what is meant by partially or substantially modulating the signal. Does the claim refer to modulating the signal with certain percentage to provide modulation depth control?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishio (US Patent No. 4,841,519).

Regarding claim 24 (as far as understood in view of the 112 2nd paragraph), Nishio discloses optical communication system as shown in Fig. 13 and discussed in col. 12, lines 29-46, comprising:

means (210) for providing a first partially frequency modulated (FM) laser signal that is different from the wavelength of a second partially FM laser signal;

means (240) for converting the first and second partially FM laser signal to respective first and second amplitude modulated (AM) laser signals;

means for multiplexing (270) the first and second partially AM laser signals to propagate in substantially the same direction.

Allowable Subject Matter

5. Claims 1-21, 23 and 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al (US Patent No. 5,737,104) is cited to show wavelength division multiplexer and demultiplexer.

Lee (US Patent No. 5,917,626) is cited to show tunable filter for use in wavelength division multiplexer and demultiplexer.

Liu et al (US Patent No. 6,748,133) is cited to show compact multiplexing/demultiplexing modules.
